

Dao Xuan Tan

AI Engineer

📍 Ho Chi Minh, Vietnam ✉ tan.daoxuan0909@gmail.com ☎ 0839 782 709 🌐 tandao0909

Summary

Native Vietnamese speaker with working proficiency in English. Data Science graduate with hands-on experience in AI model development, evaluation, and testing. Proficient in LLM and Vision-Language Model (VLM) technologies with expertise in model fine-tuning, dataset preparation, and quality assurance. Strong foundation in Python, PyTorch, and modern AI frameworks.

Education

Ho Chi Minh University of Science, Mathematics and CS
• GPA: 8.74/10.0 (3.74/4.0)

Ho Chi Minh City
Oct 2022 – present

Experience

AcamarAI, AI Engineer

Python, FastAPI, VLM, LLM, LangChain, vLLM, PyTorch

- Evaluated and tested LLM and VLM (Vision-Language Model) outputs for accuracy, performance, and quality assurance
- Performed model fine-tuning and dataset preparation to improve inference accuracy and reduce latency
- Conducted comprehensive testing of AI-generated responses and implemented quality assurance protocols
- Engineered and deployed self-hosted LLMs using FastAPI and LangChain with vLLM for optimized inference
- Developed 3 out of 14 core AI functionalities for Fortune 500 beta user companies

Ho Chi Minh
June 2025 – present
8 months

EyeCodeTech, Fullstack Developer

TypeScript, JavaScript, Python, ReactJS, Django, MongoDB, NextJS

- Conducted code reviews to ensure code quality, maintainability, and adherence to best practices
- Implemented real-time audio and video processing pipeline for IELTS speaking assessment module
- Built scoring logic and evaluation algorithms for spoken language assessment
- Solely responsible for full-stack development of mock IELTS speaking module with UI, camera/microphone input, and scoring
- Designed database schema and backend APIs using MongoDB for secure data management

Ho Chi Minh
Apr 2025 – June 2025
3 months

Certifications

- IELTS 6.5 (2022)
- GPA 3.74/4.0 (2022-Present)

Skills

AI Training & Evaluation: Model evaluation, fine-tuning, dataset preparation, QA testing, prompt engineering, VLM/LLM assessment

AI/ML Technologies: LLM, VLM (Vision-Language Models), RAG, LangChain, vLLM, PyTorch

Programming: Python, TypeScript, JavaScript

Web & APIs: FastAPI, Django, ReactJS, NextJS

Languages: Vietnamese (Native), English (IELTS 6.5 - Working Proficiency)
