

# Dao Xuan Tan

Python Software Engineer

📍 Ho Chi Minh, Vietnam    ✉ tan.daoxuan0909@gmail.com    ☎ 0839 782 709    🌐 tandao0909

## Summary

Python software engineer with experience building and improving production systems across trading infrastructure and AI applications. Delivered latency improvements for an internal DSL-based backtest pipeline, built supporting scheduling, monitoring, and API components, and worked hands-on with Kafka, Postgres, Redis, Docker, and Linux. Earlier experience includes LLM/VLM evaluation, model serving, and applied AI feature delivery.

## Education

**Ho Chi Minh University of Science**, Mathematics and CS  
• GPA: 8.74/10.0 (3.74/4.0)

Ho Chi Minh City  
Oct 2022 – present

## Experience

**Trading startup**, Python Software Engineer

Python, Kafka, Postgres, Redis, Docker, Linux

Ho Chi Minh City  
Jan 2026 – present  
3 months

- Inherited and improved an in-house backtest pipeline built around an internally developed DSL for trading strategy evaluation
- Reduced critical-path processing time to under 1 second by optimizing pipeline execution and data flow
- Built and maintained data acquisition and processing components to support backtest inputs and downstream system reliability
- Implemented commission calculation logic and overnight fee conventions using IBKR documentation as the reference standard
- Handled backend responsibilities across scheduling, monitoring, and API development for internal platform workflows

**AcamarAI**, AI Engineer

Python, FastAPI, VLM, LLM, LangChain, vLLM, PyTorch

Ho Chi Minh  
June 2025 – Dec 2025  
7 months

- Evaluated and tested LLM and VLM outputs for accuracy, performance, and quality assurance
- Performed model fine-tuning and dataset preparation to improve inference accuracy and reduce latency
- Conducted comprehensive testing of AI-generated responses and implemented quality assurance protocols
- Engineered and deployed self-hosted LLMs using FastAPI and LangChain with vLLM for optimized inference
- Developed 3 out of 14 core AI functionalities for Fortune 500 beta user companies

## Certifications

- IELTS 6.5 (2022)
- GPA 3.74/4.0 (2022-Present)

## Skills

---

**Programming:** Python, SQL, JavaScript, TypeScript

**Data & Backend Systems:** Kafka, Postgres, Redis, REST APIs, scheduling, monitoring, Docker, Linux

**Trading Infrastructure:** Backtest pipelines, internal DSL workflows, commission calculation, overnight fee conventions, IBKR references

**AI/ML Technologies:** LLM, VLM, FastAPI, LangChain, vLLM, PyTorch, model evaluation, fine-tuning, dataset preparation

**Languages:** Vietnamese (Native), English (IELTS 6.5 - Working Proficiency)
