🌐 Đào Xuân Tân

Summary

AI Engineer and Software Developer with 1 year of experience building Python internal tools, FastAPI services, data pipelines, and LLM-powered automation. Strong in Pandas, backend APIs, self-hosted AI model, RAG, prompt engineering, Docker, Kubernetes, and CI/CD.

Education

Ho Chi Minh University of Science, Mathematics and Computer Science, Data Science track

Ho Chi Minh City
Oct 2022 – Sept 2026

- GPA: 8.74/10.0 (3.74/4.0)

Experience

Pi Associates, Software Developer

Ho Chi Minh

Python, FastAPI, Pandas, PostgreSQL, Kafka, Redis, Docker, Kubernetes, GitHub Actions

Jan 2026 – present

6 months

- Own core development of an internal Python backtesting platform exposed through APIs for quant researchers and engineers across the company
- Built the core engine, FastAPI endpoints, Pandas backtest pipeline, metrics computation, result comparison, and report download workflows
- Improved backtest runtime from minutes to under 10 seconds for common runs while processing 1-5 GB of data per run
- Supported tens of thousands of daily backtest runs and about 20 internal users through API-driven workflows
- Deployed backtests as Dockerized Kubernetes jobs with scheduled pipelines for live runs
- Improved reliability through stronger error handling and input validation, reducing failed runs, manual debugging, and broken pipeline cases

AcamarAI, AI Engineer

Ho Chi Minh

Python, FastAPI, LLM, VLM, RAG, LangChain, vLLM, PyTorch

June 2025 – Jan 2026

8 months

- Deployed self-hosted LLM services with vLLM using an OpenAI-compatible API interface for internal AI features
- Built LLM workflows with FastAPI, LangChain, RAG, prompt engineering, and evaluation harnesses
- Developed 3 of 14 core AI functionalities for Fortune 500 beta users, turning product requirements into production-facing AI workflows
- Evaluated LLM/VLM outputs for accuracy, reliability, and response quality, then created repeatable QA checks for AI-generated outputs
- Prepared datasets, fine-tuned models, and optimized inference quality for task-specific AI use cases

Skills

LLM Engineering: OpenAI, OpenAI-compatible APIs, prompt engineering, RAG, LangChain, vLLM, AI output evaluation

Backend & Data: Python, FastAPI, Pandas, PostgreSQL, Kafka, Redis, API design, data pipelines, workflow automation

ML: PyTorch, TensorFlow, fine-tuning, dataset preparation, NLP, model evaluation

DevOps & Workflow: Git, code review, GitHub Actions, Docker, Kubernetes, CI/CD, agile collaboration

Languages: Vietnamese (Native), English (IELTS 6.5)
