Experience

Pi Associates, Software Engineer

Ho Chi Minh

Python, async, FastAPI, PostgreSQL, Kafka, Redis, Docker, Kubernetes, GCP, GitHub Actions

Jan 2026 – present

6 months

- Main developer responsible for an internal **Python** package, used by about 20 researchers and engineers running **tens of thousands** of runs a day
- Strong production **Python**, async work, packaging with **uv**, and a silent memory-leak fix that cut peak memory from **200+ GB to under 20 GB**
- Cut runtime from **minutes to under 10 seconds** on **1-5 GB** of data per run through parallelism and vectorization
- Shipped to production as Dockerized **Kubernetes** jobs on **GCP**, with **GitHub Actions** CI/CD and **Grafana** monitoring

- Designed and shipped **multi-step LLM agents** and orchestration workflows using **LangGraph** and **LangChain**
- Integrated and evaluated multiple model providers behind a self-hosted **vLLM** OpenAI-compatible API
- Built **RAG** pipelines, prompt engineering, and evaluation harnesses (automated scoring plus human review) for reliable agent behavior
- Owned **3** production AI features end to end (of **14** core features) for Fortune 500 beta users
